

EVOCAR

PORTABLE SCALES FOR EASY AND ACCURATE YACHT WEIGHING

EVOCAR scales are very accurate, user-friendly and durable.
Easy and effective way to weigh mass and conclude the center point of gravity.

The total yacht weight capacity with four scales is from 40t to 80t. Between the boat cradle and the scale platform we recommend special rubber and aluminium plates to get accurate weighing results. It is also possible to use thick plywood plates.

DETAILS

MODEL	multiple range scale wireless or manually readable
CAPACITY	10t/15t/20t
DISPLAY	large and easy to read LCD
RESETTING	automatic
POWER-OFF	automatic
CHARGING	115-240 V, 50-60 Hz
PROTECTION	IP 67
PLATFORM SIZE	405 X 405 mm

No cables. Several scale division alternatives.
Calibration certificates and producers declaration of conformity.
Accuracy $\pm 0,1\%$ of reading.

ACCESSORIES

- RUBBER PLATE
- ALUMINIUM PLATE
- EVODATA SOFTWARE
- COMPUTER
- PRINTER
